

# New features in Wavetool V3

## MacOS

### Mic Check

The new Mic Check mode lets you mark the microphones that are good to go and see which mics still needs to be checked, independently for four Acts. Mic Check window shows who checked the mic and when. It also shows the mics that needs to be checked per Act. There's a comment line for every channel for additional notes.

### Other changes in V3 for MacOS:

- Improved GUI
- Hard mute tool for muting the possible broken channel
- Quality Level shown in Zoom window
- Multi channel audio input patch in Ch I/O
- Show/ Hide RF, Quality and Audio levels in Zoom window
- Close Flash message with Midi message in Chat preferences
- Flash message now contains the sender information
- New improved channel assignment in Groups & Snapshots window
- Copy data function in Groups & Snapshots window
- Arrange player order by real name or role name in Player List
- Compress images -function in Player list
- Only SCP triggers Alert Rest button to red
- Alert Reset no more shown in Chat window
- Improved RSSI scaling for Shure Axient Digital
- Improved Quality Level scaling for Sennheiser Digital 9000
- Auto connect option for MacOS Remote

## iOS

### Instant Replay and Zoom window for Wavetool iOS App:

Now also iOS device users can enjoy the benefit of seeing RF & Quality levels on five minute timeline while simultaneously playing back and listening to the audio history of five minutes of the channels, that has the Instant Replay enabled in the Master Wavetool computer.

### Changes in Wavetool iOS App:

- Improved GUI
- one click return from the settings to main window
- Show/Hide for RF, Quality and Audio levels in zoom window
- Mic Check mode enabled / disabled

## Licensing changes for the existing Wavetool users:

The introduction of Wavetool V3 changes the licensing as well. The update from V2 to V3 is free of charge and needs to be done by downloading Wavetool V3 from <https://wavetool.fi/download.html>

V2 license activation code will be automatically transformed to V3 license activation code when the first time opening Wavetool V3 in the same computer which previously had a Wavetool V2 active, so please make sure you will check the box "E-mail me the new license" to get the new activation code.

If Wavetool V3 needs to be activated on a different computer than the one with Wavetool V2 license, from a License Type drop down menu choose: "use Wavetool 2 license code (idxxxxxxx..." and manually type in your V2 activation code. Also in this case your Wavetool V2 license activation code will be transformed to a Wavetool V3 activation code. Make sure you will check the box "E-mail me the new license" to get the new activation code.

After the Wavetool V3 is activated, your Wavetool V2 license will be terminated. From V2 to V3 upgrade can not be done by using "Check for updates".

### Wavetool Licenses:

Wavetool V3 simplifies the the whole licesing and from now on the available permanent licenses are:

- Wavetool LITE** with 16 channels (**NO** Chat, extra channels, Snapshots or Clients available)
- Wavetool Pro** with 64 channels (**NO** Chat, extra channels, Snapshots or Clients available)
- Wavetool Bundle** with Chat, 128 channels and Snapshots
- Wavetool Platinum Bundle** with Chat, 128 channels, Snapshots and Clients

The plug-in or in-app purchases are not any more supported in Wavetool V3.

### If you have previously purchased a Wavetool plug-in:

If you previously had a Wavetool Pro license with any of the following plug-ins,

- Chat
- 128 Channels
- Snapshots

your new license will be automatically upgraded to be **Wavetool Bundle** free of charge.

If you previously had a Wavetool Pro or Wavetool Bundle license with Clients plug-in, your new license will be automatically upgraded to **Wavetool Platinum Bundle** free of charge.
